IMAGING OF THE STOMACH IN CHILDREN: BEYOND PYLORIC STENOSIS

Pediatric Radiology, Massachusetts General Hospital, Boston, MA  •  Harvard Medical School, Boston, MA

LEUKEMIA AND LYMPHOMA

Lymphoma (BL) is a highly aggressive neoplasm of mature B cells, is one of the fastest growing tumors with a potential tumor-cell doubling time of < 24 hours. Careful evaluation for abnormal increased T2 signal may help in identifying multifocal disease within the gastric wall.

GARDNER SYNDROME

An 18 year old male with a family history of polyposis syndrome.
