Course Overview:
- **CEUS**: What, why and when?
- **Microbubble Contrast Agents**: Safety, uses, cost effectiveness and handling.
- **Introduction to CEUS**: Liver, kidney, other organ systems.
- **Getting started**: From set-up to optimizing performance.
- **Hands-on demonstrations** – live patient demonstrations featuring contrast agents and equipment of our sponsors
- **Knobology** – Break out rooms with personalized opportunities to "touch and feel" all of the featured ultrasound systems and contrast agents, examine settings, etc.

Course Objectives
- Perform a basic CEUS examination of the liver or region of interest
- Realize the requirements for initiation of a CEUS facility.
- Appreciate the protocol for successful performance of CEUS examinations of the liver
- Interpret the features of common enhancement patterns for benign and malignant liver tumors and renal masses

CME credits 7.75 Hours
