Wednesday, April 29, 2015

8:30 – 10:40 a.m.  SCIENTIFIC SESSION II-A: FETAL/NEONATAL
  Erika Rubesova, MD and Eva I. Rubio, MD, Moderators

8:30 – 8:50 a.m.  Evidenced Based Value of Fetal MRI
  Edith Y. Cheng, MD, MS

8:50 – 10:40 a.m.  Scientific Papers – Fetal/Neonatal

Paper #: 013  8:50  Basta
  Fetal stomach position predicts neonatal outcomes in isolated left-sided congenital diaphragmatic hernia

Paper #: 014  9:00  Estroff
  Normative biometrics for fetal ocular growth using volumetric MRI reconstruction

Paper #: 015  9:10  Estroff
  Correlation of fetal cerebellar measurements on US and MRI

Paper #: 016  9:20  Starr
  Placenta Accreta: Critical Diagnosis for the Pregnant Patient and Challenging Diagnosis for the Pediatric Radiologist

Paper #: 017  9:30  Hughes
  Morbidly Adherent Placenta: An Imaging Score to Improve Antenatal Diagnostic Accuracy

Paper #: 018  9:40  Ponrartana
  Sex-related Differences in the Fetal Programming of the Axial Skeleton

Paper #: 019  9:50  Rubesova
  Fetal Skeletal Development using Ultrasound Imaging

Paper #: 020  10:00  Garel
  Fetal bronchocele: imaging features and significance

Paper #: 021  10:10  Barnewolt
  Choledochal Cyst in the Fetus: Can we make and accurate diagnosis and what does it mean?

Paper #: 022  10:20  Saul
  Hypoplastic Left Heart Syndrome and the Nutmeg Lung Pattern in Utero: Cause and Effect Relationship or Prognostic Indicator?

Paper #: 023  10:30  Neelavalli
  In vivo Magnetic Resonance Angiography of fetal vasculature

Keynote Speaker
Edith Y. Cheng, MD, MS
Professor
Divisions of Maternal Fetal Medicine and Medical Genetics
Medical Director Prenatal Diagnosis
University of Washington
Seattle, WA
