Thursday, April 30, 2015

1:45 – 3:55 p.m. **SCIENTIFIC SESSION VIII-A: NEURORADIOLOGY**  
*Susan Palasis, MD and Edward Weinberger, MD, Moderators*

1:45 – 2:05 p.m. **Pediatric Stroke**  
Catherine Amlie-Lefond, MD

2:05 – 3:55 p.m. **Scientific Papers – Neuroradiology**

- **Paper #: 126**  
  2:05 Starosolski  
  Cerebrovascular abnormalities in Acta2 knockout mice: a model for pediatric cerebrovascular disease associated with ACTA2 mutations

- **Paper #: 127**  
  2:15 Loomis  
  ASL perfusion patterns reflects chronological rather than gestational age

- **Paper #: 128**  
  2:25 Ruess  
  MRI Staging of Superficial Venous Thrombosis and Infarction in Children

- **Paper #: 129**  
  2:35 Lindsay  
  Cavernous Sinus Thrombosis in Children: Imaging Characteristics and Clinical Outcome

- **Paper #: 130**  
  2:45 Ruess  
  Vein of Labbé Thrombosis and Infarction in Children

- **Paper #: 131**  
  2:55 Speidel  
  MR of Infant Subdural Hemorrhage: Incidence, Etiology, and Imaging Differentiation

- **Paper #: 132**  
  3:05 Stein  
  Optimization of MR Enterography protocol: one or two doses of antiperistaltic agent?

- **Paper #: 133**  
  3:15 Tafti  
  Magnetic Resonance Spectroscopy (MRS) in Infants with Non-accidental Mild Traumatic Brain Injury

- **Paper #: 134**  
  3:25 Ahmed  
  Sensitivity and specificity of lipid/lactate peaks on MR spectroscopy for prediction of grade in pediatric gliomas.

- **Paper #: 135**  
  3:35 Fenton  
  MR Imaging Findings Associated with Poorer Outcome in Intracranial Ganglioglioma

- **Paper #: 136**  
  3:45 Altinok  
  Utility of Diffusion Tensor Imaging for Language Lateralization prior to epilepsy surgery

**Keynote Speaker**  
Catherine Amlie-Lefond, MD  
Associate Professor of Neurology  
Seattle Children’s Hospital  
Seattle, WA
